Re: APPGRT manifesto (for Radiotherapy improving cancer survival with a modern world class radiotherapy service)

Dear Action Radiotherapy,

We would like to formally state that women's cancer research charity, The Eve Appeal, supports the APPGRT manifesto.

We believe that cancer patients across the UK should have access to world-class radiotherapy treatments and hope that cancer survival rates will improve with a modern radiotherapy services – as set out in the 5-year cancer strategy by National Cancer Director, Cally Palmer.

We fully support Action Radiotherapy in their efforts to secure funding and expertise for the thousands of patients nationwide who are prescribed radiotherapy as part of their cancer management.

Kind regards,

Athena Lamnisis,
Chief Executive
