

Thank you for the opportunity to highlight some of the issues and concerns from a lung cancer perspective that we as a charity feel the focus needs to be on:

- Early detection – public awareness campaigning, continuation of the current PH campaigns, encouraging people with symptoms to seek investigation and rolling out of Lung Cancer Screening / Targeted Lung Health checks.
- Implementation of the National Optimal Lung Cancer Pathway – including need for better access to CT screening.
- Need for clinical audit data, in real time, to monitor activity and outcomes, strengthening of the National W

We also clearly support the recommendations submitted by One Cancer Voice
